# GLADIOLI

WHOLESALE  
RETAIL

G. A. EARL  
VERNON, - New York

In this list we do not attempt a complete description of the various varieties, but give the predominating colors only.

Quotations are subject to previous sale and bulbs are priced per dozen. Six will be sold at the dozen rate. For price per single bulb divide the price per dozen by ten. For price per hundred multiply the price per dozen by six. For larger quantities we solicit correspondence. Delivery prepaid at single bulb or dozen rates.

We are growing several hundred varieties. Should you wish something not listed we probably have a small stock of it or can procure it for you.

Our bulbs are well grown, well cured and carefully rogued. The stock is practically 100 per cent. pure. If through error any should not prove true to name we will replace those proving untrue.

We have large stocks of all the commercial varieties and solicit inquiries concerning smaller sizes, planting stock or bulblets.

A. B. Kunderd (K)—Primrose, cream & blush pink, ruffled..	\$10.00
Adelina Patti (L)—Bishops purple .....	2.50
Albania (Kp)—Pure glistening white, one of the best....	7.50

.....

## THE FLOWER GROWER

For All Who Grow Flowers, is a valuable monthly magazine devoting liberal space to the gladiolus. Published by Madison Cooper, Calcium, N. Y. Subscription price \$1.50 per year, three years for \$3.50.

.....

## THE GLADIOLUS BULLETIN

Is a small magazine devoted exclusively to the gladiolus and is filled with interesting and helpful articles. Published monthly by Stanley Thorp, Medway, Mass., at fifty cents per year.

.....

## MIXTURES

We do not grow in mixture but the identity of some bulbs become lost in handling and to these we add such varieties as will produce a well balanced assortment and sell at the rate of \$3.00 per 100, or 30 bulbs for \$1.00. This good stock for those who do not care to preserve the names of varieties.

## CULTURE

The culture of the *Gladiolus* is so simple as to render it the most satisfactory of garden flowers, thriving and blooming freely with the least care and attention and making a display which for beauty of bloom and brilliancy of coloring is unequalled by any other flower. If you can grow potatoes you can grow *Gladioli*. Plant in any good garden soil as soon as the ground is workable up to the middle of June. If several plantings are made at different times the season of bloom will be lengthened. Do not plant in shade of trees or buildings, and do not allow fresh manure to come in direct contact with the bulbs. Use well-rotted manure, commercial fertilizer, wood ashes or bone meal, well mixed with the soil.

Set the bulbs five or six inches deep in rows and about three to four inches between each bulb. Rows about 18 inches apart. Or may be massed in beds about four inches apart each way. If planted in quantity and to be cultivated with a horse make rows 30 to 36 inches apart. Keep soil loose and free from weeds. When cutting flower spike let three to four leaves remain on the plant to allow the bulb to mature properly. Dig bulbs in the fall, cut off tops, and after drying in the open air for a few days store away in a dry, cool but frost proof place in the cellar.

Of all the summer flowering plants, few, if any, have made more rapid progress in popular favor than the *Gladiolus*.

On account of its good keeping qualities the *Gladiolus* surpasses all other flowers for cutting purposes, and in order to obtain the utmost pleasure from the blooms you should cut the spikes as soon as the first flower opens on the stalk and place them in vases in the house. A vase of blooms may be kept fresh for a week or more. Not only that but the colors will be brighter and more beautiful when cut than when out in the sunny garden. The *Gladiolus* is particularly adapted to table decoration. Cut the spike in the morning or evening when the first bloom opens. Change the water daily, remove the withered portions, and cut (on a slant) an inch or so off end of each stem. Every bud will open one by one to the very top.
